ANNOUNCES

Art. 1 Research Project

There will be a public selection procedure, based on qualifications and an interview, for the assignment of **n. 2 (two) - "Type of Grant: "Graduate Fellowships" ("Assegno di Ricerca Professionalizzante")** for conducting research related to the Scientific Area **"Informatics"** at the Institute of Cognitive Sciences and Technologies, CNR – Roma, in the scope of the research project "RESTART", under the scientific responsibility of dr. Riccardo De Benedictis.

Research program:

Design and implementation of a long-term planner for a robotic assistance system, with a focus on customizing and adapting robotic activities to users' cognitive conditions. The system, currently under development, is organized on three levels, which include the generation and execution of plans, the sequencing of actions and the control of sensors and actuators. Robotic tasks as autonomous services through a service-oriented approach, enabling different levels of customization and adaptation. It will also be customized to address the challenges of human-robot interaction in healthcare contexts, with the aim of overcoming current limitations, managing uncertainty and integrating numerical and temporal reasoning. Our consolidated approach, based on previously implemented components, aims to simplify the management of robotic tasks in long-term plans, clearly distinguishing functional and non-functional aspects through a clear separation between interface, logic and Quality of Service attributes.

Art. 2
